State: Madhya Pradesh

Agriculture Contingency Plan for District: Shahdol

1.0 District Agriculture profile					
1.1	**Agro-Climatic/Ecological Zone**				
	Agro Ecological Sub Region (ICAR)	Central Highlands (Malwa And Bundelkhand), Hot Subhumid (Dry) Eco-Sub region (10.3)			
	Agro-Climatic Zone (Planning Commission)	Eastern Plateau And Hills Region (VII)			
	Agro Climatic Zone (NARP)	North Hill Zone of Chattisgarh (MP-3)			
	List all the districts or part thereof falling under the NARP Zone	Shahdol, Sidhi, Anuppur, Dindori, Mandla and Umaria			
	Geographic coordinates of district headquarters	Latitude	Longitude	Altitude	
		22° 38' to 24° 20' N	80° 28' to 82° 12' E	457 msl	
	Name and address of the concerned ZRS/ ZARS/ RARS/ RRS/ RRTTS	RARS, Rewa			
	Mention the KVK located in the district	Programme Coordinator Krishi Vigyan Kendra, Kalyanpur, Distt. Shahdol- 484 001			
1.2	**Rainfall**	Normal RF(mm)	Normal Onset	Normal Cessation	
	SW monsoon (June-Sep):	1063.1	2nd week of June	1st week of October	
	NE Monsoon(Oct-Dec):	57			
	Winter (Jan-Feb)	63.8			
	Summer (March-May)	42.1			
	Annual	1226		-	

1.3	**Land use pattern of the district** (latest statistics)	Geographical area	Cultivable area*	Forest area	Land under non-agricultural use	Permanent pastures	Cultivable wasteland	Land under Misc. tree crops and groves	Barren and uncultivable land	Current fallows	Other fallows
Area ('000 ha)		561.0	231.3	227.8	44.6	6.5	40.8	0.7	9.3	30.8	27.7

* Net sown area + current fallow + old fallow

1. 4	**Major Soils (common names like red sandy loam deep soils (etc.,)***	**Percent (%) of total**
	Deep soils	67.3
	Medium deep soils	18.3
	Shallow soils	14.3

Source: NBSS & LUP, Nagpur

1.5	**Agricultural land use(2008-09)**	**Area ('000 ha)**	**Cropping intensity %**
	Net sown area	172.8	117
	Area sown more than once	28.9	
	Gross cropped area	201.7	

(Source : Agriculture Statistics 2009, Directorate of Farmer Welfare and Agriculture Development Madhya Pradesh, Bhopal)

1.6	**Irrigation**	Area ('000 ha)		
	Net irrigated area	20.8		
	Gross irrigated area	20.8		
	Rainfed area	152.0		
	Sources of Irrigation	Number	Area ('000 ha)	Percentage of total irrigated area
	Canals	76	4.4	21.1
	Tanks	451	2.4	11.5
	Open wells	2470	3.8	18.2
	Bore wells	513	1.3	6.2

	Lift irrigation schemes river	NA	-	
	Micro-irrigation		-	
	Other sources (reservoir)	2865	8.90	42.81
	Total Irrigated Area		20.80	
	Pump sets	10780	-	-
	No. of Tractors	872	-	-
	Groundwater availability and use* (Data source: State/Central Ground water Department /Board)	No. of blocks/ Tehsils	(%) area	Quality of water (specify the problem such as high levels of arsenic, fluoride, saline etc)
	Over exploited	-	-	-
	Critical	-	-	-
	Semi- critical	-	-	-
	Safe	05	-	-
	Wastewater availability and use	-	-	-
	Ground water quality	-		
*over-exploited: groundwater utilization > 100%; critical: 90-100%; semi-critical: 70-90%; safe: <70%				

1.7 Area under major field crops & horticulture etc. (2008-09)

1.7	**Major Field Crops cultivated**	**Area ('000 ha)**							
		Kharif			***Rabi***			**Summer**	**Total**
		Irrigated	***Rainfed***	**Total**	***Irrigated***	***Rainfed***	**Total**		
	Rice	-		105.1	-			-	105.1
	Kodo Kutki	-		15.0	-			-	15.0
	Maize	-		12.0	-			-	12.0
	Pigeonpea	-		8.2	-			-	8.2
	Blackgram			6.6					6.6
	Sesame			6.3					6.3
	Wheat						20.0	-	**20.0**
	Mustard						3.2		3.2
	Chickpea						2.9		2.9
	Linseed						2.5		2.5

	Horticulture crops - Fruits	**Total area(ha)**	**Irrigated**	**Rainfed**
	Mango	9.0	-	
	Water Chestnut	22.0	-	
	Goava	20.0	-	
	Others (specify)			
	Horticultural crops - Vegetables	**Total area(ha)**	**Irrigated(ha)**	**Rainfed**
	Okra	124	-	-
	Brinjal	113	-	-
	Potato	610	-	-
	Tomato	162	-	-
	Chilies	47	-	-
	Others (specify)		-	-

(Source : Agriculture Statistics 2009, Directorate of Farmer Welfare and Agriculture Development Madhya Pradesh, Bhopal)

	Medicinal and Aromatic crops -	**Total area**	**Irrigated**	**Rainfed**
	-	**NA**	-	-
	Others (specify)	-	-	-

	Plantation crops -	**Total area**	**Irrigated**	**Rainfed**
	-	**NA**	-	-
	Others such as industrial pulpwood crops etc (specify)	-	-	-
	Fodder crops -	**Total area**	**Irrigated**	**Rainfed**
	-	**NA**	-	-
	Others (specify)	-	-	-
	Total fodder crop area	-	-	-
	Grazing land	-	-	-
	Sericulture etc	-	-	-
	Others (Specify)	-	-	-

1.8	**Livestock**	**Male ('000)**	**Female ('000)**	**Total ('000)**
	Non descriptive Cattle (local low yielding)			388.1
	Crossbred cattle			NA
	Non descriptive Buffaloes (local low yielding)			NA
	Graded Buffaloes			110.8
	Goat			100.7
	Sheep			8.1
	Others (Pig ,horse etc)			9.1
	Commercial dairy farms (Number)	-	-	-
1.9	**Poultry**	**No. of farms -NA**	**Total No. of birds ('000)**	
	Commercial	-	-	
	Backyard	-	-	

1.10	**Fisheries** (Data source: Chief Planning Officer)						
	A. Capture						
	i) Marine (Data Source: Fisheries Department)	**No. of fishermen**	**Boats**		**Nets**		**Storage facilities (Ice plants etc.)**
			Mechanized	Non-mechanized	Mechanized (Trawl nets, Gill nets)	Non-mechanized (Shore Seines, Stake & trap nets)	
		-	-	-	-	-	-
	ii) Inland (Data Source: Fisheries Department)	**No. Farmer owned ponds**		**No. of Reservoirs**		**No. of village tanks**	
		141		**14**		**1379**	
	B. Culture						

		Water Spread Area (ha)	Yield (t/ha)	Production ('000 tons)
	i) **Brackish water** (Data Source: MPEDA/ Fisheries Department)			-
	ii) **Fresh water** (Data Source: Fisheries Department)	1584-	Village ponds 2000 kg/ha and Reservoirs 70 kg/ha	-
	Others	-	-	-

1.11 Production and Productivity of major crops

1.11	Name of crop	Kharif		Rabi		Summer		Total		Crop residue as fodder ('000
	Rice	83.8	817					83.8	817	
	Kodo Kutki (Minor millets)	6.6	338					6.6	338	
	Maize	10.1	868					10.1	868	
	Pigeonpea	4.0	503					4.0	503	
	Blackgram	2.2	362					2.2	362	
	Wheat			18.5	862			18.5	862	
	Mustard			1.4	370			1.4	370	
	Chickpea			1.3	412			1.3	412	
	Linseed			0.7	263			0.7	263	
	Lentil			0.2	398			0.2	398	
Major Horticultural crops (NA)										
	Mango					-	-	-	-	-
	Aonla					-	-	-	-	-
	Guava					-	-	-	-	-
	Okra-Tomato					-	-	-	-	-
	Brinjal					-	-	-	-	-

(Source : Agriculture Statistics 2009, Directorate of Farmer Welfare and Agriculture Development Madhya Pradesh, Bhopal)

1.12	**Sowing window for 5 major field crops** (start and end of normal sowing period)	**Rice**	**Kodo**	**Maize**	**Wheat**	**Chickpea**
	Kharif- Rainfed	2nd week of June- 3rd week of July	2nd week of June – 2nd week of July	2nd week of June – 3rd week of June	-	-
	Kharif-Irrigated	3rd week of June- 3rd week of July	-	3rd week of June – 2nd week of July	-	-
	Rabi- Rainfed	-	-	-	3rd week of October – 2nd week of November (up to 10 Nov)	2nd week of October - 4th week of October
	Rabi-Irrigated	-	-	-	2nd week of November- 2nd week of December	1st week of November – 3rd week of November

1.13	**What is the major contingency the district is prone to? (Tick mark)**	**Regular**	**Occasional**	**None**
	Drought	-	√	
	Flood	-	-	√
	Cyclone	-	-	√
	Hail storm	-	√	-
	Heat wave	-	√	-
	Cold wave	-	√	-
	Frost	-	√	-
	Sea water intrusion	-	-	√
	Pests and disease outbreak (specify)	-	√	-

	Others (specify)		-	-	-
1.14	**Include Digital maps of the district for**	Location map of district within State as Annexure I	Enclosed: Yes		
		Mean annual rainfall as Annexure 2	Enclosed: Yes		
		Soil map as Annexure 3	Enclosed: Yes

2.0 Strategies for weather related contingencies

2.1 Drought

2.1.1 Rainfed situation

2.1.1 Rainfed situation

Condition			Suggested Contingency measures		
Early season drought (delayed onset)	**Major Farming situation**	**Normal Crop/cropping system**	**Change in crop/cropping system**	**Agronomic measures**	**Remarks on Implementation**
Delay by 2 weeks **4th week of June**	**Upland unbunded shallow soils**	Maize	**No change**	Follow normal recommended package of practices Timely sowing can be done Dry sowing of paddy Lehi method of sowing in Rice Sowing of Maize by ridge & furrow method	Seed availability, SAU, Beej nigam, NSC, Farmers societies.
		Kodo			
		Kutki			
		Niger			
		Soybean			
	Upland bunded shallow (gravelly sandu) soils	Paddy			
		Maize			
		Pigeonpea			
	Lowland bunded deep and medium deep soils	Paddy-Chickpea/lentil			
		Paddy-Wheat/ lentil/Mustard			
		Soybean			

Condition			Suggested Contingency measures		
Early season drought (delayed onset)	**Major Farming situation**	**Normal Crop/cropping system**	**Change in crop/cropping system**	**Agronomic measures**	**Remarks on Implementation**
Delay by 4 weeks	**Upland unbunded shallow soils**	Maize	**Donot sow maize** Prefer alternate crops like	Moisture conservation practices like ridging, conservation furrows,	Seed availability, SAU, Beej nigam, NSC, Farmers

2nd week of July			Sesame, kodo, kutki, Blackgram, Greengram and Pigeonpea.	dust mulch etc.,	societies.
		Kodo	**Kodo**- Jawahar Kodo-1, 2, 41, 62, 101, 147, 439, Jawahar-48, Jawahar, 155, JK-106		
		Kutki	**Kutki -** Jawahar Kutki 1, 2, 8, JK 36		
		Niger	**Niger**-–JNC-6, JNC-1, JNC-9, JVN-1		
		Soybean	**Soybean**: JS 335, JS 95-60 Or **Blackgram –** JU-2, JU-3, JU-86, T-9, JBG-623, LBG 684, TAU-1, Berkha, PU-30,35,19 **Or** **Greengram:** Pusa vishal, K851, JM721, Jawahar 99 - 37, Hum-1, Hum-2,Tarme-1 L.G.450, T.M.98-50, JM-98-90, PDM 11, 54 and 139		
	Upland bunded shallow(gravelly sandu) soils	Paddy	**Paddy**: JR- 201		
		Maize	**Donot sow maize** Prefer alternate crops like Sesame, kodo, kutki, Blackgram, Greengram and Pigeonpea.		
		Pigeonpea	**Pigeonpea-** Pragati ,Jagriti,,Asha ,Nmuber-148,JKM-7,JA-4, Type-21-Pusa-855, ICPL-85063 (Laxmi), JKM-189

	deep and medium deep soils	Paddy-Wheat/ lentil/Mustard			
		Soybean	**Soybean**: JS 335, JS 95-60		

Condition			**Suggested Contingency measures**		
Early season drought (delayed onset)	**Major Farming situation**	**Normal Crop/cropping system**	**Change in crop/cropping system**	**Agronomic measures**	**Remarks on Implementation**
Delay by 6 weeks **4th week of July**	**Upland unbunded shallow soils**	Maize	Maize intercropping with Caster **Donot sow soybean after 10th July** Donot sow Maize, Kodo, Kutki, Blackgram and Greegram Prefer alternate crops like kodo, kutki, Sesame and Niger **Sesame-** TKG -306, TKG-35, JGS-8, JT-21, JT-22, JT-55, PKTS-11, PKTS-12, JT-1 **Niger**-–JNC-6, JNC-1, JNC-9, JVN-1 **Kodo**- Jawahar Kodo-1, 2, 41, 62, 101, 147, 439, Jawahar-48, Jawahar, 155, JK-106 **Kutki -** Jawahar Kutki 1, 2, 8, JK 36	Line sowing with seed treatment and balance fertilizer. Line sowing Blade harrowing (Bakhar) for moisture conservation Intercropping of Sesame and niger with Pigeonpea	Seed availability, SAU, Beej nigam, NSC, Farmers societies.
		Kodo			
		Kutki			
		Soybean			
		Niger	**Niger**-–JNC-6, JNC-1, JNC-9, JVN-1		
	Upland bunded	Paddy	Prefer to sow alternate crops		

	shallow(gravelly sandu) soils	Maize Pigeonpea	like kodo, kutki, Sesame and Niger		
	Lowland bunded deep and medium deep soils	Paddy-Chickpea/lentil Paddy-Wheat/ lentil/Mustard Soybean	Prefer to sow alternate crops like kodo, kutki, Sesame and Niger **(Donot sow soybean after 10th July)**		

Condition			**Suggested Contingency measures**		
Early season drought (delayed onset)	**Major Farming situation**	**Normal Crop/cropping system**	**Change in crop/cropping system**	**Agronomic measures**	**Remarks on Implementation**
Delay by 8 weeks **2nd week of August**	**Upland unbunded shallow soils**	Maize Kodo Kutki Niger Soybean	**Prefer alternate crops**, Niger, Castor in kharif and plan for early rabi crops like mustard, linseed ,lentil.	1. Blade harrowing (Bakhar) for moisture conservation 2. Intercropping of Sesame and Niger with Pigeonpea. 3. Moisture conservation by repeat ploughing. 4. Prepration of field for rabi crop 5. Line sowing is preferable	Source of seed SAU, NSC & SSC For Agronomic Measures the Ongoing scheme like RKVY NREGS etc
	Upland bunded shallow(gravelly sandu) soils	Paddy Maize Pigeonpea			
	Lowland bunded deep and medium deep soils	Paddy-Chickpea/lentil Paddy-Wheat/ lentil/Mustard Soybean			

Condition			**Suggested Contingency measures**		
Early season drought (Normal onset)	**Major Farming situation**	**Normal Crop/cropping system**	**Crop management**	**Soil & moisture conservation measures**	**Remarks on Implementation**
Normal onset followed by 15-20 days dry spell after sowing leading to	**Upland unbunded shallow soils**	Maize Kodo Kutki Niger	1. Prefer alternate crops like Soybean, Pigeonpea, Greengram and Blackgram on bunds	1. Blade harrowing (Bakhar) for moisture conservation 2. Adopt moisture	Source of seed SAU, NSC & SSC For Agronomic Measures the

poor germination/crop stand etc.		Soybean	2. Weed management by using hand hoe between crop row.	conservation practices. 3. Conservation of excess rain water in high rainfall areas. 4. Mulching. 5. Provide light irrigation through farm pond. 6.Re-sowing,	Ongoing scheme like RKVY NREGS etc
	Upland bunded shallow(gravelly sandu) soils	Paddy Maize Pigeonpea	1. Resowing of direct seeded rice 2. Drought resistant varieties of Rice (JR 201),		
	Lowland bunded deep and medium deep soils	Paddy-Chickpea/lentil Paddy-Wheat/ lentil/Mustard Soybean	**1.** Prefer alternate crops like Soybean, Pigeonpea, Greengram and Blackgram on bunds **2.** Weed management using hand hoe between crop row. **3.** Drought resistant varieties of Rice (JR 201),		

Condition			**Suggested Contingency measures**		
Mid season drought (long dry spell, consecutive 2 weeks rainless (>2.5 mm) period)	**Major Farming situation**	**Normal Crop/cropping system**	**Crop management**	**Soil & moisture conservation measures**	**Remarks on Implementation**
At vegetative stage	**Upland unbunded shallow soils**	Maize Kodo Kutki Niger Soybean	Life saving irrigation if available Maintain optimum plant population	Provide Supplemental irrigation if available Mulching, Spray of anti-transpirants. Interculture with Dora/Kulpha/Hand hoe in between rows Use uprooted weeds as mulch for moisture	-
	Upland bunded shallow(gravelly sandu) soils	Paddy Maize Pigeonpea			
	Lowland bunded deep and medium deep soils	Paddy-Chickpea/lentil Paddy-Wheat/ lentil/Mustard Soybean			

				conservation. Ridges are made after 15-20 lines of crops for the moisture conservation Adopt plant protection measures	

Condition			**Suggested Contingency measures**		
Mid season drought (long dry spell)	**Major Farming situation**	**Normal Crop/cropping system**	**Crop management**	**Soil nutrient & moisture conservation measures**	**Remarks on Implementation**
At Flowering stage	**Upland unbunded shallow soils**	Maize	Life saving irrigation if available -	1. Interculture with Dora/Kulpha/H and hoe in between rows . 2. Use of uprooted weeds use as mulch for moisture conservation. 3. Ridges are made after 15-20 lines of crops for the moisture conservation 4. Adopt plant protection measures	-
		Kodo			
		Kutki			
		Niger			
		Soybean			
	Upland bunded shallow(gravelly sandu) soils	Paddy			
		Maize			
		Pigeonpea			
	Lowland bunded deep and medium deep soils	Paddy-Chickpea/lentil			
		Paddy-Wheat/ lentil/Mustard			
		Soybean			

Condition			**Suggested Contingency measures**		
Terminal drought (Early withdrawal of monsoon)	**Major Farming situation**	**Normal Crop/cropping system**	**Crop management**	**Rabi Crop planning**	**Remarks on Implementation**
	Upland unbunded	Maize	1. Life saving irrigation	1. Prefer to sow Lentil,	Source of seed

	shallow soils	Kodo	through sprinkler. 2.Soil moisture conservation by use of mulch. 3.Prefer to sow short duration crop varieties .	Linseed, Cickpea, irrigated and unirrigated wheat 2. Seed treatment with mixture of Thiram (1.5g)+ Carbendazim (1.5g) /kg seed followed by treated with biofertilizers 3. Sowing of small seeded grains mix with FYM and vermicompos 4. Apply light irrigation to Kharif crops for proper grain filling if required and this will helpful in field preparation of *Rabi* crops	SAU, NSC & SSC For Agronomic Measures the Ongoing scheme like RKVY NREGS etc
		Kutki			
		Niger			
		Soybean			
	Upland bunded shallow(gravelly sandu) soils	Paddy			
		Maize			
		Pigeonpea			
	Lowland bunded deep and medium deep soils	Paddy-Chickpea/lentil

		Soybean			

2.1.2 Irrigated situation

Condition			Suggested Contingency measures		
	Major Farming situation	**Normal Crop/cropping system**	**Change in crop/cropping system**	**Agronomic measures**	**Remarks on Implementation**
Delayed release of water in canals due to low rainfall	Medium deep to deep soils	Paddy-Wheat/ lentil/Mustard Paddy-Chickpea/lentil	Green gram-Mustard/ Black gram-Wheat/ Black gram- Chickpea Fallow-Chickpea Medium duration variety of Rice (JRH-4,5,8, MTU 1010, IR-64, PS-3,5,)	Adopt water saving methods like direct seeded rice, SRI Cultivation, Aerobic rice **Wheat** Prefer short duration low water requirement varieties of wheat. Protective irrigation at CRI stage in wheat. **Chickpea** should be sown with residual moisture after harvest of soybean or give p re sowing irrigation to chickpea. Maintain optimum plant population	--

Condition	Major Farming situation	Normal Crop/cropping system	Suggested Contingency measures		
			Change in crop/cropping system	Agronomic measures	Remarks on Implementation
Limited release of water in canals due to low rainfall	Medium deep to deep soils	Rice-Wheat Rice -Chickpea	Rice-Chickpea / Green gram-Wheat(Early) Black gram/ Greengram-Wheat Limited irrigation requirement varieties of Wheat (JW 3020, JW 3173, 3269, HW 2004, Sujata) should be sown Limited irrigation requirement varieties of Chickpea (JG 218, 226, 130, 11, 14)	Adopt water saving methods like direct seeding seeded rice, SRI Cultivation, Aerobic rice **Blackgram/ Greengram:** Adopt *in-situ* moisture conservation practices at 30DAS Maintain optimum plant population Irrigate at critical stages Conservation tillage **Wheat** Prefer short duration low water requirement varieties of wheat. Protective irrigation at CRI stage in wheat. **Chickpea** should be sown with residual moisture after harvest of soybean or give p re sowing irrigation to chickpea	-

Condition			Suggested Contingency measures		
	Major Farming situation	**Normal Crop/cropping system**	**Change in crop/cropping system**	**Agronomic measures**	**Remarks on Implementation**
Non release of water in canals under delayed onset of monsoon in catchment	Medium deep to deep soils	Rice-Wheat Rice -Chickpea	Rice-Chickpea / Green gram-Wheat(Early) Blackgram-Chickpea/ wheat	**Blackgram/ Greengram:** Adopt *in-situ* moisture conservation practices at 30DAS Maintain optimum plant population Irrigate at critical stages Conservation tillage Farm bundin Deep ploughing Mulching	-

Condition			Suggested Contingency measures		
	Major Farming situation	**Normal Crop/cropping system**	**Change in crop/cropping system**	**Agronomic measures**	**Remarks on Implementation**
Lack of inflows into tanks due to insufficient /delayed onset of monsoon	Not applicable				

Condition			Suggested Contingency measures		
	Major Farming situation	**Normal Crop/cropping system**	**Change in crop/cropping system**	**Agronomic measures**	**Remarks on Implementation**
Insufficient groundwater recharge due to low rainfall	Not applicable				

2.2 Unusual rains (untimely, unseasonal etc]) (for both rain fed and irrigated situations)

Condition	**Suggested contingency measure**			
Continuous high rainfall in a short span leading to water logging	**Vegetative stage**	**Flowering stage**	**Crop maturity stage**	**Post harvest**
Rice	Drain the excess water as early as possible Apply 20 kg N + 10 kg K /ha after draining excess water Take up gap filling either with available nursery or by splitting the tillers from the surviving hills Take up suitable plant protection Measures in anticipation of pest & disease out breaks	Drain the excess water as early as possible Apply 20 kg N + 10 kg K /ha after draining excess water Take up suitable plant protection Measures in anticipation of pest & disease out breaks	Drain the excess water as early as possible Take up suitable plant protection measures in anticipation of pest & disease out breaks	Drain out water and spread sheaves loosely in field or field bunds where there is no water stagnation Spray common salt at 5% on panicles to prevent germination and spoilage of straw from moulds Thresh after drying the sheaves properly Ensure proper grain moisture before storing
Maize	Drain the excess water as early as possible Apply 20 kg N + 10 kg K /ha after draining excess water Take up inter cultivation and at optimum soil moisture condition to loosen and aerate the soil and to control weeds Earthing up the crop for anchorage Spray KNO_3 1 % or water soluble fertilizers like 19-19-19, 20-20-20, 21-21-21 at 1% to support nutrition Take up timely control measures for Pink stem borer, sheath blight and Turcicum leaf blight	Drain the excess water as early as possible Apply 20 kg N + 10 kg K /ha after draining excess water Spray KNO_3 1 % or water soluble fertilizers like 19-19-19, 20-20-20, 21-21-21 at 1% to support nutrition Take up timely control measures for sheath blight and post flowering stalk rots	Drain the excess water as early as possible Allow the crop to dry completely before harvesting	Harvest the cobs after the they are dried up properly. Dry the grain to optimum moisture condition before storing

Pulses & Minor millets	Provide drainage, care should be taken that rain water does not stagnate in the field.	Change care should be taken that rain water does not stagnate in the field.	Care should be taken that rain water does not stagnate in the field.	Produce should be placed under shade. Or protect the produce by tarpaulin kept in T flown
Wheat	Care should be taken that rain water does not stagnate in the field and not allow to top drashing of nitrogenous fertilizers.	Care should be taken that rain water does not stagnate in the field and not allow to top drashing of nitrogenous fertilizers.	Proper drainage should be provided and adopt all plant protection measures	-
Chickpea	Care should be taken that rain water does not stagnate in the field and not allow to top drashing of nitrogenous fertilizers.	Care should be taken that rain water does not stagnate in the field and not allow to top drashing of nitrogenous fertilizers.	Proper drainage should be provided and adopt all plant protection measures	
Heavy rainfall with high speed wind in a short span	Not applicable			
Out break of pests and diseases due to unseasonal rains				
Rice	Spraying of Monocrotophos 36 EC 14 ml or Cypermethrin 10 EC 6 ml per 10 liter of water against stem borer	Spraying of Monocrotophos 36 EC 14 ml or Cypermethrin 10 EC 6 ml per 10 liter of water against stem borer	Removal and destruction of infected panicles due to Loose smut	-
Maize	Plant protection measures for stem borer, army worm. Control stem borer. For control of leaf blight spray Mancozeb @ 2.5g/l.	Plant protection measures for Rust, TLB. Control cob worm and rust PP measures for Stalk rot/rust//TLB by spraying Hexaconozole @ 0.1 %	Plant protection measures for Rust / TLB/Leaf spot in Maize	-
Soybean	Carry out critical survey of fields for insect and disease attack in crops	Carry out critical survey of fields for insect and disease attack in crops	Carry out critical survey of fields for insect and disease attack in crops	-

2.3 Floods

Condition	**Suggested contingency measure[o]**			
Transient water logging/ partial inundation	**Seedling / nursery stage**	**Vegetative stage**	**Reproductive stage**	**At harvest**
Continuous submergence for more than 2 days	Not applicable			
Sea water intrusion				

2.4 Extreme events: Heat wave / Cold wave/Frost/ Hailstorm /Cyclone

Extreme event type	Suggested contingency measure[r]			
	Seedling / nursery stage	**Vegetative stage**	**Reproductive stage**	**At harvest**
Heat Wave	-	-	-	-
Rice	Light and repeated irrigation at the appearance of hair line cracks in soil surface, Correct iron deficiency with 0.5% iron sulphate spray.	Repeated irrigation at the appearance of hair line cracks in soil surface, pounding of water for 15 days after transplanting to check Fe deficiency and for crop establishment.	Repeated irrigation at the appearance of hairline cracks in soil surface	Harvest crop at physiological maturity
Maize, Pigeonpea and Blackgram	Protect the crop with the help of light irrigation, wind breaks are necessary where cold and heat wave in regular	Protect the crop with the help of light irrigation; wind breaks are necessary where cold and heat wave in regular	Protect the crop with the help of light irrigation; wind breaks are necessary where cold and heat wave in regular	Protect the crop with the help of light irrigation
Horticulture	-	-	-	-
Mango , Guava	Protect the crop with the help of light irrigation, wind breaks are necessary where cold and heat wave in regular	Protect the crop with the help of light irrigation; wind breaks are necessary where cold and heat wave in regular	Protect the crop with the help of light irrigation; wind breaks are necessary where cold and heat wave in regular	Harvest at physiological maturity
Cold wave	-	-	-	-
Chick pea Wheat	Light irrigation Smoke generation at night time to rise temperature	Light irrigation Smoke generation at night time to rise temperature	Light irrigation Smoke generation at night time to rise temperature	Harvest at physiological maturity
Frost				
Chickpea, Lentil, Pigeonpea	Give light irrigation, Smoke generation at night time to rise temperature wind breaks are necessary where cold and heat wave in regular	Protect the crop with the help of light irrigation; Smoke generation at night time to rise temperature wind breaks are necessary where cold and heat wave in regular	Protect the crop with the help of light irrigation, Smoke generation at night time to rise temperature wind breaks are necessary	Harvest at physiological maturity -
Horticulture				

Tomato	Delay or late raising of Nursery		Protect the crop with the help of light irrigation, Smoke generation at night time to rise temperature wind breaks are necessary	-
Potato	Cold Toleratant Variety is grown i.e. Pusa Sheetal of Tomato			-
Chilli, Dhania Methi, Cauliflower	-	-		-
Hailstorm	-	-	-	-
Wheat, chickpea	Re-sowing in case of severe damage	Light and frequent irrigation.	• Apply 10% additional nitrogen • Light and frequent irrigation	Timely harvesting and shifting of produce to safer place in case of early forewarning
Mango , Guava- fruit crops	Not applicable	Prune damaged branches and twigs and apply Bordeaux paste 1% to avoid fungal infections	Prune damaged branches and twigs and apply Bordeaux paste 1% to avoid fungal infections Apply hormonal spray NAA 20 ppm + 1 % urea to prevent flower board	Immediate harvesting, grading and marketing of produce
Cyclone	Not applicable			

2.5 Contingent strategies for Livestock, Poultry & Fisheries

2.5.1 Livestock

	Suggested contingency measures		
	Before the event	During the event	After the event
Drought			
Feed and fodder availability	As the district is occasionally prone to drought the following practices may be implemented to prevent fodder shortage problem Sowing of cereals (fodder varieties of Sorghum/ Bajra) and leguminous crops (Lucerne, Berseem, Horse gram, Cowpea) during North-East monsoon under dry land system for fodder production. Collection of soybean and chick pea stover for	Harvest and use biomass of dried up crops (Rice, wheat, Maize, Soybean, Black gram, Green gram, chick pea etc.,) material as fodder Harvest all the top fodder available (Subabul, Glyricidia, Pipol, Prosopis etc) and feed the LS during drought Concentrate ingredients such as Grains,	Encourage progressive farmers to grow multi cut fodder crops of sorghum/bajra/maize with input subsidy Supply of quality stem cuttings of Hybrid napier (CO1), paragrass, guinea grass etc., well before monsoon

	use as feed supplement during drought Preserving the green maize fodder as silage Encourage fodder production with Bajra – stylo-Bajra on rotation basis and also to cultivate short-term fodder crops like sunhemp	brans, chunnies & oilseed cakes, low grade grains etc. unfit for human consumption should be procured from Govt. Godowns for feeding as supplement for high productive animals during drought Promotion of Horse gram as contingent crop and harvesting it at vegetative stage as fodder Continuous supplementation of minerals and vitamin to prevent infertility. Encourage mixing available kitchen waste with dry fodder while feeding to the milch animals	Encourage growing fodder crops like Berseem in winter and Juar in summer season Flushing the stock to recoup Replenish the feed and fodder banks
Drinking water	Adopt various water conservation methods at village level to improve the ground water level for adequate water supply. Identification of water resources De-silting of ponds Rain water harvesting and create water bodies/watering points (when water is scarce use only as drinking water for animals) Construction of drinking water tanks in herding places/village junctions/relief camp locations Community drinking water trough can be arranged in sandies /community grazing areas	Adequate supply of drinking water. Restrict wallowing of animals in water bodies/resources; Add alum in stagnated water bodies	Watershed management practices shall be promoted to conserve the rainwater. Bleach (0.1%) drinking water / water sources Provide clean drinking water
Health and diseases management	Procure and stock emergency medicines and vaccines for important endemic diseases of the	Carryout deworming to all animals entering	Keep close surveillance on

	area All the stock must be immunized for endemic diseases of the area Surveillance and disease monitoring network to be established at Joint Director (Animal Husbandry) office in the district Adequate refreshment training on draught management to be given to VAS, Jr.VAS, LI with regard to health & management measures Procure and stock multivitamins & area specific mineral mixture	into relief camps Identification and quarantine of sick animals Constitution of Rapid Action Veterinary Force Performing ring vaccination (8 km radius) in case of any outbreak Restricting movement of livestock in case of any epidemic Tick control measures be undertaken to prevent tick borne diseases in animals Rescue of sick and injured animals and their treatment Organize with community, daily lifting of dung from relief camps	disease outbreak. Undertake the vaccination depending on need Keep the animal houses clean and spray disinfectants Farmers should be advised to breed their milch animals during July-September so that the peak milk production does not coincide with mid summer
Floods	**NA**		
Cyclone	NA		
Heat wave and cold wave			
Heat wave	i) Plantation around the shed ii) H_2O sprinklers / foggers in the shed **iii)** Application of white reflector paint on the roof **iv)** Thatched sheds should be provided as a shelter to animal to minimize heat stress	Allow the animals early in the morning or late in the evening for grazing during heat waves Feed green fodder/silage / concentrates during day time and roughages / hay during night time in case of heat waves Put on the foggers / sprinklers /fans during heat weaves in case of high yielders (Jersey/HF crosses) In severe cases, vitamin 'C' and electrolytes should be added in H_2O during heat waves.	Feed the animals as per routine schedule Allow the animals for grazing (normal timings)
Cold wave	Covering all the wire meshed walls / open area with gunny bags/ polyethylene sheets (with a mechanism for lifting during the day time and	Allow for grazing between 10AM to 3PM during cold waves Add 25-50 ml of edible oil in concentrates and	Feed the animals as per routine schedule Allow the animals for grazing

	putting down during night time)	fed to the animal during cold waves Apply / sprinkle lime powder in the animal shed during cold waves to neutralize ammonia accumulation	(normal timings)
Insurance	Encouraging insurance of livestock	Listing out the details of the dead animals	Submission for insurance claim and availing insurance benefit Purchase of new productive animals

2.5.2 Poultry

	Suggested contingency measures		
	Before the event	During the event	After the event
Drought			
Shortage of feed ingredients	Storing of house hold grain like maize, broken rice etc, in to use as feed in case of severe drought	Supplementation only for productive birds with house hold grain Supplementation of shell grit (calcium) for laying birds Culling of weak birds	Supplementation to all survived birds
Drinking water		Use water sanitizers or offer cool hygienic drinking water	
Health and disease management	Culling of sick birds. De-worming and vaccination against RD and IBD	Mixing of Vit. A,D,E, K and B-complex including vit C in drinking water (5ml in one litre water)	Hygienic and sanitation of poultry house Disposal of dead birds by burning / burying with lime powder in pit
Floods	**NA**		
Cyclone	NA		
Heat wave and cold wave			

Shelter/environment management	**Heat wave:** Provision of proper shelter with good ventilation	In severe cases, foggers/water sprinklers/wetting of hanged gunny bags should be arranged Don't allow for scavenging during mid day	Routine practices are followed
	Cold wave: Provision of proper shelter Arrangement for brooding Assure supply of continuous electricity	Close all openings with polythene sheets In severe cases, arrange heaters Don't allow for scavenging during early morning and late evening	Routine practices are followed
Health and disease management	De-worming and vaccination against RD and fowl pox	Supplementation of house hold grain Provide cool and clean drinking water with electrolytes and vit. C In hot summer, add anti-stress probiotics in drinking water or feed	Routine practices are followed

2.5.3 Fisheries/ Aquaculture

	Suggested contingency measures		
	Before the event	During the event	After the event
Drought			
Shallow water in ponds due to insufficient rains/inflow	1. Restricted release of water from reservoir. 2. Supplementary water harvest structures like pond and tanks have to be developed. 3. Renovation and maintenance of existing water harvest structures	1. Restrict lifting of water for irrigation purpose of crops 2. Catch the stock, market the produce to reduce the density of population in ponds.	1. Excavate the ponds to increase the depth. 2. Try to release water into the pond if it rains in off-season
Impact of heat & salt load build up in ponds / change in water quality	1. Prepare to release water into the habitat	1. Mixing of water from the water harvest structure like ponds and tanks into the fish habitat.	1. Monitoring the water quality and health of aquatic organisms
Floods	**NA**		
Cyclone	**NA**		
Heat wave and cold wave			
Management of pond	Good water quality to be maintained, Water	Recirculation of water and pruning	Water treatment with lime

environment	depth to be maintained		
Health and diseases management	Prophylactic measures to be taken	Maintain good quality water in ponds	Treatment of pond water with lime and medicines
